

News from Mickey

Almost 14 days ago, we informed you about the fate of Mickey, the street cat.

The treatments are working well, his skin problems have been solved and he is getting a little better every day. He has been castrated and is being fed the best food. He is currently living with us at the shelter. However, we don't have an enclosure for cats and Mickey doesn't know how to be close to so many dogs.

In any case: We promised you to give him back his pride and we have achieved that.

At 11 years old, Mickey is a street cat through and through. We thought for a long time whether it would be a good choice for him to be placed in a home, to tear him away from his familiar surroundings. Anyone who knows cats knows that a fixed location is very important and that any change can throw them off track. And Mickey is a confident cat, he is bursting with energy.

Therefore, we have decided to return him to his colony at the harbour. There he is well looked after at the Post Office Square, volunteers bring food and water there in the evenings and have been doing so for years. The cats are tolerated there by the residents.

We promise you that we will keep an eye on Mickey, because one of our employees from the animal shelter feeds there on a substitute basis.
