

### Discarded because sick? ☹️

An animal-friendly resident of Aegina contacted us to draw our attention to a very thin dog that had run to him and was no longer leaving his side. Unfortunately, this resident cannot keep the dog as he has a large family of cats to look after.

Our team immediately went to pick him up. An emaciated, very thin little fellow, covered with skin problems. A hunting dog. He is older, how old we cannot say yet because of his condition. We estimate his age to be 8 - 9 years.

Although our shelter is currently housing many dogs, once again we couldn't say no and adopted him.

A loyal adoptive family has already named the little guy - **SOTOS ♥️**. He will be put on the site shortly. As he is likely to take a very long time to recover, we will post him on our page under adoptions for the time being. Although he has an extraordinarily kind character and will surely soon find a family who will offer him a forever place.

Please stay loyal to us and support our so important work! Thank you so much on behalf of the animals.
