

## News from Vegas

You know the sad story of Vegas:

Vegas' difficult fate almost took our breath away. He was hit by a car. The impact on his hind legs was so strong that the nerves were severely damaged, leaving him paralysed. An X-ray showed that he did not suffer any fractures, but the nerves were badly crushed.

With the help of medication and appropriate vitamin supplements and physiotherapy, we are trying to train Vegas. Building up the muscles and training the traumatised nerve region so that what is there is strengthened. In the meantime, he can already stand and walk a few laborious steps. We believed in the miracle, because Vegas wants to, he is a friendly young dog who wants to live and have fun.

We are sure that he once had a home because he is very open-minded and friendly towards people.

With our available resources, we are trying everything so that he can walk again one day.

Unfortunately, in the daily grind of life at the shelter, it is very difficult for our crew to spend enough time with Vegas to work with him physiotherapeutically. But he needs this daily physiotherapy and must learn to move on his own and also in his donated wheelchair in a way that uses his legs.

Now the miracle has happened: We have found a competent foster home on Aegina. One condition is that we take over the running costs for Vegas. And for this reason we need you and your financial support to be able to afford this special edition as well.

Please draw attention to Vegas and his fate and look for sponsors who are willing to bear these costs together with us. To apply for sponsorship, please contact [chkopacek@gmx.de](mailto:chkopacek@gmx.de). Any amount is welcome!

Many thanks in the name of Vegas. We will keep you informed!
