

## A nobody dog - we named him Aeneas

Once again, an animal hater on Aegina has managed to drastically change the life of a dog. From one day to the next. In Kipseli, a village in Aegina, a dog was found that could only move on its hind legs. He had been shot in both front legs, so that the large joints in the shoulder area were shot. We initially took him in at the animal shelter and are looking for a supposed owner via Facebook, as the dog is not chipped.

If no owner comes forward, we will have to decide what to do with him. We will of course keep you informed and will do everything we can for Aeneas.
